

# Product information

## Skin and hand disinfectant PLUS

150 ml	SUN111D
250 ml	SUN111E
400 ml	SUN111F
500 ml	SUN111G
1000 ml	SUN111I
2500 ml	SUN111K

## Characteristics

- Very good skin tolerance, dermatologically tested with the rating "very good"
- No dyes and a very pleasant skin care system  
(on request with the innovative emollient system)
- Short application times with a wide spectrum of efficacy, based on polyalcohol
- Bactericidal, levurocidal, tuberculocidal and limited virucidal PLUS effect
- With highly-purified ingredients

## Product type

Skin-friendly disinfectant for application to the skin and preparing poultices. Within a very short time it provides a comprehensive spectrum of efficacy against bacteria incl. tuberculosis, fungus (candida albicans) and enveloped viruses such as HIV, HBV, HCV and flu viruses.

## Area of application

Ready-for-use hand disinfectant with lipid-replenishing effect for the hygienic and surgical disinfection of hands.

## Notes on application

The product is particularly suitable for highly-frequent use in medical applications, as well as for use in public institutions and the food industry.

For hygienic hand disinfection, rub the hands with 3ml of the solution and keep them moist for the application time stated below. For surgical hand disinfection, rub the hands and forearms with the solution and keep them moist for 1½ minutes. Always close the original container securely after use - dermatologically tested.

## Composition

100g of the solution contains:

10g 1-propanol, 55.8g ethanol.

## Chemical-physical data

Density: 0.89 g/cm<sup>3</sup>

pH-value: 5.5

## Application times

### Hygienic hand disinfection as per EN 1500:

Conc. 30 sec.

### Surgical hand disinfectant as per EN 12791:

Conc. 90 sec.

### Bacteria and *C. albicans* as per EN 13727, EN 1276, EN 13624 and EN 1650 (dirty conditions):

Conc. 30 sec.
